

Mechanical properties of

the rotational angle: 300º ± 10º

rotation torque: 20 ~ 200gf.cm

Location Location: Center click only

locate drivers: 50 ~ 300gf.cm

stopper strength: ≤6kgf.cm

axis swing: Within (0.7 × L / 20) mm PP Max L = Shaft Length.

switching angle: 50 ° ± 10 °

switching power: 150 ~ 450gf.cm electrical performance and error total resistance: 1KΩ <1MΩ ± 20%, 1KΩ≥R≥1MΩ ± 30% resistance characteristics Curve: Refer to P.166 load power: Linear Taper 0.2W Other Taper 0.1W maximum operating voltage: 150V AC residual resistance: Refer to P.165 rotation noise: ≤47mV Insulation resistance: ≥100MΩ at 250V DC withstand voltage: 1 minute at 250V AC synchronous error: ≤ ± 3dB at -40 ~ 0Dbswitch under load: 12V DC 1A max switch residual resistance: ≤0.5Ω durability
